"The Way of a Girl," with Eleanor Boardman, Matt Moore and William Russell at the Rex theater on Friday and Saturday nights this week. From the story by Katherine Newlin Burt.

In the Stampede, B. competition recently held, the local cadet corps was awarded second place in the provincial honors, with a score of 74.12 per cent. The Wainwright team secured first place and Camrose third.

The weather of the past week has been too rough for June, and though one day of high wind and dust interfered to some extent, good progress has been made with seeding during the week.

Claresholm Odd Fellows observed the 107th anniversary of the Order by attending a special service in St. John's church last Sunday. The service was well attended and a local chapter from Beaver Lodge of Stavely. The members met at the lodge rooms and paraded in to the church, where an impressive service was conducted by Rev. W. C. Marsh of Calgary, formerly of Claresholm and a member of the local lodge. The Rev. Mr. Marsh preached an appropriate sermon on the subject "The Spirit of Friendship," address being listened to with interest and profit by the members of the Order, as well as by others present.

Card of Thanks

I just a few words to express, in behalf of myself and the children, our heartfelt gratitude for the sympathy and kindness shown us by our friends and neighbors, and by the many people who sent cards during our recent bereavement. Also to those who sent floral tributes. Thank you friends.

Wm. K. Cornish.

Lated 24th April, 1926.

SCHOOL FAIR ASSOCIATION

A well attended meeting of the School Fair Association was held in the Canadian Bank of Commerce on Saturday evening. In the absence of the president, Rev. W. C. Marsh, Mr. Haslam was asked to take the chair. The report of the treasurer showed a substantial balance on hand.

The following officers were elected: President, J. J. Strong; treasurer, G. Shearer.

The following names were suggested for the executive: L. C. Cramer, S. H. Gardner, H. O. Haslam, J. Davidson, P. J. Peter, J. N. Woolin, Frank Murray, C. A. O'Neill, Jas. Lane, J. L. Salmon, O. Mosley, J. P. Heyland, Geo. Bell, Mrs. H. R. Smith, Frank Shipp, Fred Laing, A. W. Miller; all teachers of the schools.

A committee to revise the Prize List was named. This new list will be distributed to the schools at an early date.

The date of Monday, September 20th, was suggested for the holding of the fair.

It is the intention to make an effort to increase the sports program at the fair under the direction of a special committee.

EARLY CLOSING BY-LAW

Notice is hereby given that a petition has been presented to the Council of the Town of Claresholm to provide for the early closing of shops.

WHEREAS a petition has been circulated throughout the Town praying that certain shops be closed during certain periods; AND WHEREAS the said petition has been signed by at least two-thirds of the shops affected by the said petition;

AND WHEREAS the Council of the Town of Claresholm deems it advisable to grant the prayer of the said petitioners,

NOW, THEREFORE, the Mayor and Council of the Town of Claresholm, under the authority of the Order and subject to the provisions of "The Early Closing Act," being Chapter 127 of the Revised Statutes of Alberta, enacts as follows:

1. "Shop" shall have the same meaning as defined in The Early Closing Act.

2. All shops within the limits of the Town of Claresholm shall close at 6 o'clock afternoon on each and every day except Saturday except as hereinbefore provided.

3. All shops within the limits of the Town of Claresholm shall close at 12 o'clock noon on each and every Wednesday between May 15th and August 15th, both dates inclusive, in each and every year hereafter.

Any person violating any of the terms of this By-Law shall be liable to the same penalties as are provided in The Early Closing Act.

Done and Passed in open Council this of 1926.

Mayor

Secretary-Treasurer

Notice is hereby given to all that objection is taken to the petition presented to the Council praying for the passing of such by-law on the ground that such petition is insufficiently signed or otherwise affected in validity. Objection is also taken that the petition was filed with the Secretary-Treasurer of the Town on or before the 10th day of May, 1926; and if no such objections are filed before the said date the Council will then proceed to pass the said closing by-law.

Dated at Claresholm this 9th day of April, 1926.

Claude J. Andunden,

Secretary-Treasurer

D. A. ANDERSON

RED ROSE "is good COFFEE"

A Matter of National Concern

Canada unquestionably derives many advantages from its close proximity to the United States with its large population, marvellous industries, and great wealth. Many of these advantages are now being lost. It would be a waste of time to even enumerate them. But, on the other hand, it is equally true that Canada suffers as a result of the very close and intimate relations which exist between the Dominion and its big neighbor to the south. These advantages and disadvantages are very largely confined to the realm of economics.

The subject is so large that volumes could be written on it, pro and con. Among the many phases or angles of the complex questions involved in this very large problem, there is one which is now the matter of considerable discussion in Canada, because, while it is economic in its origin, it contains with in itself possibilities affecting the whole social, industrial and political life of the country.

In a sparsely settled, largely undeveloped country like Canada, with people spread thin over half a continent, and with some sections having little in common, except sentimentally, with other sections, there is naturally lacking that community of interest, and resultant national spirit and consciousness, which animates smaller and more thickly populated countries. There is, in fact, no nation in the world which is so lacking and underdeveloped in its culture, while, in other respects, it is even quite equal in touch and sympathy with the central Provinces, which latter are more or less self-satisfied and self-satisfied and lack understanding of both the east and west.

Montreal and St. John are closer to Boston and New York than they are to Montréal or Toronto; Montreal and Toronto are closer to New York, Philadelphia and Chicago than they are to Winnipeg; Winnipeg is closer to Chicago and Minneapolis than to Vancouver or Victoria; Vancouver is closer to Seattle, Portland and San Francisco than to Canadian centres. Such is the geographical position which nothing can overcome.

It is, therefore, that Great Britain could make much to help us to know and understand each other better, and bring closer together through the medium of national publications, weekly and monthly magazines and periodicals. Valiant efforts have been put forth by public-spirited men and women to provide such media, but with indifferent success, considering there are nine million people in Canada. The reason for failure is not for certain.

With a population twice that of Canada, United States publishers can develop enormously large circulations for their magazines. As a result they can command fabulous prices for advertising from the large and wealthy national manufacturers. With enormous revenues from their control, these publishers can dominate the market, beat writers, artists and illustrators. The result is they can turn out the most attractive magazines, and of a class and at a price which Canadian publishers in their more limited field cannot begin to approach. And, as Canadians desire the very best obtainable in magazines, as in every other field, these United States publications have largely claimed the lion's share of our readership.

It is, therefore, to be the natural effect of this flooding of Canadian homes with United States publications? This is a question causing much concern not only to many Canadians but to thoughtful students of affairs throughout the Empire and in other countries. Canadians are being constantly supplied with the narrow United States viewpoint on all international subjects, which the average person in Canada, save a few, does not understand and does not affect the big results. Canada is a member and proud supporter of the League of Nations, yet our people are supplied daily, weekly, monthly, with open and veiled criticism and jibes from the press. The United States' viewpoint is urged as the only right one, and all others wrong. We are led upon the open charge for lawlessness, corruption, graft, etc., etc., etc., etc., etc., we have failed to do to the same extent as the rest of the world. In the case of the United States, which characterizes the social life of the United States today, we are inundated with stories of the coming bankruptcy of Great Britain and the breaking up of the British Empire; and so on ad nauseam.

What will be the effect on the social life and political institutions of Canada if we keep it up for another generation or two? Is there any remedy that can be found?

Canadian publishers believe that at least a partial remedy is possible, but that it must be applied in an economic way; that is, the remedy is not to be found in the aridly exclusive of United States magazines, but in providing a means whereby Canadian publishers will be given a reasonable chance to earn a living in Canada, and in the production of Canadian periodicals more or less on a par from the standpoint of literary and artistic production than from those across the line.

As the subject is one which concerns all Canadians, it is proposed to examine further into the subject in a subsequent article.

Immigration Rush Begins

The week of March 15 saw the real opening of the spring rush of immigrants to Western Canada, when the National Railways transported during the week approximately 15,000 immigrants from the eastbound to Winnipeg by special and regular trains and thence to their final destinations on prairie farms and in British Columbia.

Mrs. Jones!—And how many evenings will you expect off each week? never give me more than two.

Now Maid!—I'm afraid that won't do maid! You see, I'm a debaute this season.

Demand For Farm Lands

The larger dealers at Winnipeg report an increased demand for farm lands, and half-section transactions with one-third cash as first payment. Land prices seem to have held steady to Winnipeg by special and regular trains and thence to their final destinations on prairie farms and in British Columbia.

A grocer's clerk may not be as heavy as a dry goods clerk, but always weighs more.

Photographers are responsible for many of lie's misrepresentations.

Dominion Revenue Increasing

Figures Show Considerable Gain Over Preceding Year

Ordnance revenue in the Dominion increased by nearly twenty-nine millions during the eleven months ended February 28 last, as compared with the previous year-end period. The annual statement issued by the Department of Finance shows total ordinary revenue for the eleven months or \$337,839,119 as compared with \$308,912,267 for the previous corresponding period. Ordinary revenue is to be taken as the same as a year ago. On February 28 last it totalled \$376,629,117.

Joint Soreness Subdued, Swelling Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVILLE

"My testimony should convince any one that Nerville is a wonderful preparation to cure any kind of joint pain. Rheumatism left me badly crippled," writes Mr. J. C. Smith, of Fort Frances, who went to McKay's Drug Store and they recommended Nerville, which restored him.

For rheumatic pains, lameness, sciatica, etc., you will get lasting satisfaction with Nerville.

Send everywhere.

Decrease In Railway Accidents

Number of Fatalities Through Accidents Is Also Less

A considerable decrease in the number of railway accidents is shown in the annual of the Dominion railway board for the calendar year 1935. During these 12 months there were 2,713 accidents on Canadian railways, of which 1,000 were serious, resulting in 1,000 persons injured, as compared with 2,834 accidents in the previous year when 318 persons were killed and 2,534 persons injured. Classifying these casualties, there were six killed in 1926 and 10 in 1927; 17 in 1928; 75 in 1929; 116 in 1930; 107; and 190 others killed as against 193, 75 in 1932; 116 in 1933; 76 killed in 1934 and unreported 116 in 1935.

During 1928 there were 583 fires originating within 300 feet of the railway lines, and these fires burned over 57,430 acres, destroying forest over 1,000,000 cubic feet of timber. The Poles of the Canadian Pacific and the Hudson's Bay Company had 100 per cent of the property valued at \$77,629. There were 36 public buildings at the board last year.

Poland's New Sea Port

Gdynia Will Be Strictly Up-to-Date In Three Years

On recent maps, writes a correspondent of the London Spectator, the name Gdynia has been given to a new port now under construction in Danzig but still within the frontage on the Baltic given to Poland by the Treaty of Versailles. It is a dry fishing hamlet of about 200 souls, and the Polish Government has given the Poles the title. Poland purchased Gdynia in July 1923 contracts for the construction of a new port there were made with a powerful Franco-Polish group. By 1930 Gdynia will be a port of 100,000 tons, with a tonnage of 1,000,000 tons, and a annual handling capacity of two and a half million tons, equal to the present capacity of Danzig. It is backed by a level plain on which a town of 3,000 people has already been built. The Poles are anxious what about Danzig if Gdynia succeeds and the Poles repeat: "It will not be long before we shall be able to make full use of both Danzig and Gdynia."

A Household Medicine—They that are acquainted with the sterling properties of Dr. Thomas' Eclectic Oil in the treatment of colds, will be surprised to find that this oil, in addition to its effects in dealing with grippe and colds, is an inexpensive medicine. So keep it at hand, for it can tell if it may come into use.

Vodka In Russia

Demand For National Drink Is Increasing According To Government Report

Russia is becoming an insatiable thirst for vodka.

Although the government within the last six months has more than doubled its output of vodka, it has been unable to meet the demand for the national drink.

According to figures announced, the government will produce 500,000,000 quarts of vodka during the coming year, which will yield the state about \$50,000,000 in revenue or ten per cent of the entire budget.

It's a good thing for humanity that some people are not as big as they think they are—the world would be overcrowded.

Although the government within the last six months has more than doubled its output of vodka, it has been unable to meet the demand for the national drink.

According to figures announced, the government will produce 500,000,000 quarts of vodka during the coming year, which will yield the state about \$50,000,000 in revenue or ten per cent of the entire budget.

It's a good thing for humanity that some people are not as big as they think they are—the world would be overcrowded.

Canadian Pacific Crop Report

The Canadian Pacific Railway's crop report for Alberta under date of April 26 says: Spring operations throughout the province are under way and seeding more or less general. Heavy winds

militated against great progress being made during the past week, causing as follows: "Favorable to weather and soil moisture. No great amount is done yet, and while an odd district reports 25 per cent and 30 per cent of this work as accomplished, the average acre sown up to date is only 10 per cent. With continuance of present weather great advancement is looked for this week. Slight increase in acreage will be made and there is no prospect of any very substantial increase under fodder corn and sweet clover. Stock wintered well and were practically out in the open during the whole season."

THREE GENERATIONS REPRESENTED BY PARTY OF U.S. SETTLERS FOR SASK.

THREE generations of hardy Americans were represented by this first party of settlers to cross the line this season under the supervision of Prof. O. B. Grinnell, manager of the passenger department of the Canadian National Railways at St. Paul, Minn., who appears in the photograph seated in the back row. Twenty-four individuals, of whom 21 were bound for Lethbridge, had been brought from the C.N.R. last year, and three for Kinsella, Sask., made up the new settlers from the United States. They brought with them five cars of machinery and live stock. This entire party came from Milwaukee, where Prof. E. F. Kennedy with their children and

grandchildren, numbering 21 persons; Mrs. J. A. Kennedy, his wife, and her husband and daughter; Mr. and Mrs. J. C. Webber and small son; Mr. and Mrs. W. D. McLaughlin, the Kennedy connection is taking up four farms at Lindsay, Sask., and the other settlers came from the United States has just begun according to C.N.R. colonization office. Prof. Grinnell, who was vice-president in charge of that department, who has just visited the United States, states that the flood of inquiries being received from the United States settlers are from a splendid type of farmer and a larger movement is expected next year. It is the opinion of many years past—C.N.R. Photo.

The United Church

"Why go to Church?" will be the theme of the morning service in the United Church this coming Sunday, May 2. "Can I be a good Christian and not go to church?" This will be a practical Gospel message for the young.

"What must I give up if I become a Christian?" will be the theme of the evening sermon, continuing the series of Sunday evenings on "The Five Fundamentals." There's always a hearty welcome for you at the doors of this church.

The Sunday school meets at the close of the morning service; the Junior class at St. Andrew's Hall, the Senior school and adults at St. Andrew's Church and Hall. There's a place for everyone.

The regular mid-week services is held each Wednesday evening at 8 o'clock in St. Andrew's Hall. The subject for St. Andrew's next Wednesday evening will be, "Life after death." You are invited.

Four Square Gospel

Sunday, May 2nd:
11 a.m. Communion service.
1:30 p.m. Sunday school and Bible class.
3:30 p.m. Evangelistic. Subject, "Spirit and Loss".
7:30 p.m. Subject, "Will all mankind be blessed by the future Kingdom?"

Tuesday, 8 p.m. Evangelistic.
Wednesday, 8 p.m. Young People's.

Friday, 8 p.m. Prayer meeting at Bro. Thomas'.
A. P. Swanton, Pastor.

Nazarene Church Announcements

May 2nd:
11 a.m. Worship. Sermon by the pastor.
12 m. Sunday school.
Miss Nola Smith superintendent.
We welcome the children to our school.
3:30 p.m. Service at Greenbank.
7:30 p.m. Evangelistic service.
"Come with us and we will do thee good."
Rev. Mrs. Bean, Pastor

FIRE THREATENS OUR NATIONAL HERITAGE

Carelessness Destroys 3,000,000 acres annually of Canadian Forest

Loss of standing timber by fire continues to be appalling. On the average, over 3,500 million board feet are destroyed annually. The forests of Canada are being depleted at a rate they cannot possibly withstand; more than half of this depletion is due to fire, insects and decay. The future of the forest industry is just as dependent on the seedling trees and young growth as the pulp and paper mills, and industry generally, are dependent on mature timber—both must be saved from the ravages of fire.

In addition to the shelter afforded by the forest to the farmer and his stock, settlers in forested regions are vitally dependent on the woods for winter employment. Care with fire in land-clearing operations is all-essential.—burned timber pays no wages.

Canada has the finest inland fishing in the world, but these splendid food and game fish require clean, cold water in the streams to ensure prolific reproduction. Forest fires are inimical to fish life.

Game animals attract foreign tourists and induce Canadians to seek pleasure, health, and adventure in the great outdoors. These animals are distinctly a forest resource—utterly dependent on it for protection and food. Forest fires are most destructive of such wild life.

Ninety per cent of the forest fires are caused by carelessness. Are you doing your part to prevent this wanton waste and destruction?

The Fame Of Marquis Wheat

Buenos Aires Paper Says That It Helped to Win the War

Marquis wheat won the great war! That was the conclusion of the Buenos Aires Standard, commenting on an editorial in the recent shipment of 2,000 bushels of registered seed from Marquis, as follows:

"The most notable victor to these shores will be Marquis wheat. The encouragement comes from Canada where the distinguished traveler, 2,000 bushels of him, has embarked for Argentina. The question has been asked: What was the war that made the world eat for demagogues? Some say Joffre, many French and the Old Contingent. But history will do Marquis wheat justice. There is no greater seed wheat than that to come from the prairie. It is, however, a special sort of wheat, selected and sown by an observant Canadian farmer, Mr. Sanders, of Manitoba. Little did he dream when he sowed it, that before the greatest war that ever was seen, he had won it on his homestead in Ottawa. Marquis wheat is that which fed the troops and the country. Marquis wheat is the single grain the wheat has given to the dominating crop in Canada and the United States. And now it is coming to Argentina. Will the crop be decimalized in its value? Well there can't be a doubt in the mind of the conception in the Casa Rosada." We think not, and yet the coming crop will probably do more for this country than any other since that state war. Jim Jaray arrived on the scene.

Ships With Funnels Popular

Travelers Like Them Whether They Are Used or Not

The British, Americans and new citizens of Canada are being fitted with funnels. No plume of smoke will ever last so long, for funnels are not essential to oil-burners. But travelers like ships with funnels, and the public is following suit.

The public takes to new forms of transportation, but prefers that they retain the picturesque qualities of the old. Shipping companies have been doing their best to fit ships with a fine funnel. If two ships are leaving port the same day and are precisely alike save that one has two stacks set back at a rakish angle, the public looks on with admiration. For years wireless stacks have been added to working funnels to gratify this idiosyncrasy of the public.

Years ago ocean steamers carried tall funnels to distinguish them from the necessity for this auxiliary had passed. Travelers were used to salts and thought the tall rigging prattle that the masts display on later-day steamers were unnecessary. Ships today are equipped with smoke stacks quite innocent of any practical purpose, but associated in some way in the public mind with the power of a passenger liner. The public maker is now inventing a new mode of display emancipated from any suggestion of horse-drawn vehicles? That transition has been slow. Our first models were built after the order of Captain C. G. Grey, who gave them the name "knockabout" and "couch" survival. We seem to shed our last in these matters with a curious reluctance—Detroit News.

Not A Large Order

A timber merchant was sitting in his office one day, musing sadly over the general depression in trade, when a customer, simply a man entered.

"Are you not bedeviled?" asked the stranger.

"Yes, sir," replied the timber man, rising fervently to hook a large order; "we're simply in it like a ton of coals."

"Oh, I don't want so much as that," said the young man, slitting his feet unmercifully, "I just want a big a vise-hold."

Where the Difference Lies

London newspapers are amazed at the idea recently advanced by J. S. H. of the importance of Canadian news handlings in doing business in Britain. Through lack of time, one editor agrees with a comment here that the chief difference in experience is a matter of time. As it is a race his hotel bill. That is a distinction few would seek these days—Toronto Globe.

How Comintins Are Made

The huge desert of Gold, in Central Asia, was once a sea. Yet most of it is now thousands of feet above sea level. The same editor said of the Samara Desert in North Africa: Geologists say that every continent in turn rises, then sinks, and that when one sinks another comes up. At present, part of the belt of the North Pacific is rising, and perhaps that will be the next continent.

Dancing To Individual Music

Experiment In Radio Music To Be Tried Out In London

British music which is audible only to the dancers themselves is the idea of Prof. A. M. Low, of the Wireless League. He is trying to persuade the league to try his plan when it gives its dance at the Savoy Hotel on March 15. Prof. Low proposes, says the Daily Express, to equip each dancer with a head phone fitted for individual transmission. By the use of the phone, says the dancer who will be able to hear only his own music, he can dance, keeping excellent time without a sound while a not of music will be audible to the spectators.

The music will be played in another room, and will be heard by a concealed transmitter to the dancer.

Prof. Low claims if his experiment is successful, people who dislike hearing jazz will escape annoyance, when, for instance, they are living in a room where dancing is in full swing without hearing a note of the music.

It is difficult to estimate exactly to what this crossword puzzle has contributed to the development of the crossword principle beyond the initial letters of each line, seems to have been the work of Venetian Humanist Clemente Marzio. An Italian poet who died in 1535 A.D. He compiled various words in which both the first and last letters of each verse when read vertically add two words to those poems. He also tried to make the lines make sense if taken in a crossword pattern. This, of course, called for a spacing of the letters to enable the reader to read horizontally as well as vertically. The truth is distorted by pomposity and optimism that half the time we do not know what it is—Howe's Monthly.

Not with hope, but with intelligent optimism. Optimism is no cure for a bad disease.

But pessimists, abusive writers and speakers always find eager audience, but these writers should be careful to give the truth and good things full play.

True optimistic writers should be fair with the other side. The truth is distorted by pomposity and optimism that half the time we do not know what it is—Howe's Monthly.

Willings To Help

For hours they had been together on her front porch. The moon cast its pale glow down on the porch and the bushes growing wild, a strange, far apart. He sighed, she sighed.

"Finally, "I wish I had money," she said. "I'd travel."

Impulsively, she slipped her hand into his, then rising, she sped off to the house. Again, he lay on his bed. In his hand, in his palm lay a nickel.

Sharing Stories

British medical authorities are worried by the persistent increase of sleeping sickness among school children, and by its serious after effects, particularly on conduct and character.

Adventurous Highway

Chinese Silk Merchants Centuries Ago

Centuries Ago By Chittenden

More than forty centuries ago the Chinese started surprising energy in canal building, having dug not one but many for irrigation purposes, a fact which has been proved by the finds of the archaeologists. The Chinese took the canals seriously. A relief has been unearthed showing an early King named Yu-Engsu, with the monarch in an attitude of adoration before the Moon, the Sun, and the stars, while the people are digging the canals.

Impulsively, she slipped her hand into his, then rising, she sped off to the house. Again, he lay on his bed. In his hand, in his palm lay a nickel.

There is no danger of getting a "pumpkin" fever in watermelons, even if both are grown in the same field.

Optimism And Pessimism

Both Are Essential If People Want To Be Efficient

Inas F. Marsonen is one of the great men who is audible only to the dancers themselves is the idea of Prof. A. M. Low, of the Wireless League. Has Required Little Change

Thermometer As Invented By Fahrenheit Was Almost Perfect

Gabriel Fahrenheit, the German who invented the thermometer was a native of Danzig, and was so poor that he was early driven into trade against his bent. But he was not a man of average intelligence, and he soon became master of the art of making glass bottles and thermometers containing spirits of wine, a type with which he was already well familiar; but in his spare moments he worked out his idea of replacing the spirits by mercury, and successfully did so, inventing the modern thermometer.

The thermometer has changed little in the two hundred years since it was invented, as well old Fahrenheit himself could hardly have imagined that its accuracy was placed in a tube properly graduated and marked off at regular intervals, temperature could only be accurately measured by observing the fluctuations of the mercury. So he marked the tube, and the scale was born.

Get back that lost weight!

When you start to waste away to a shadow, when the color leaves your cheeks and your poor, tired legs will hardly hold up your body, you know that time you started taking a fine tonic and toner like Tanias.

Tanias is a tonic and toner that make you feel that life's worth living. Made from roots, herbs and minerals found in the far corners of the earth and compounded under the exclusive Tanias formula, it restores what the poor, starved body needs.

First of all it cleanses the blood stream and puts the digestive system in order so you find after a few days treatment, that you want to eat. Pretty soon you begin to feel strong again, to come back into your cheeks and the reason tells you that you're gaining weight again. You can eat only a short time until you're feeling fit as a fiddle.

Millions of good, young women take Tanias with great benefit. More than one hundred thousand testimonies are glowing tributes to this wonderful tonic.

What do you know it has worked wonders for so many folks it's folly not to take advantage of Tanias' help yourself. Don't

Gained Health, Strength,
Vigor, Weight

"Cheats indulges himself for two years. I lost weight and strength and could do no work. Then I began to take Tanias and now I am strong again and enjoy vigorous health again."

Mr. Louis Calzadis

THE STORY THUS FAR

Joanna, pretty, modern, shop girl alone in the world, has never known anything but poverty and a life of the hump of life. Her lips are like red, her hair bobbed, her dresses short, her smile clear, and her hips moving. She is a young woman from the August presence of Graydon, her employer. She is expecting to be dismissed.

CHAPTER II.

Into the Kingdom of Money

For a long time Graydon silently waded down the aisle who had swayed him to the stable. The letter he had given her with the small, leather book, shook in her hand. She held it before her, an arm resting across her knees. Her eyes stared at the cover, then she closed her lids tightly, shook her head ever so little, and parted her lips again, as if the words on the paper mirrored before the fascination of her eyes. She had straightened them out by shaking the confusion out of her brain.

Once she let her hand drop, and kept her eyes closed for what might have been a minute or two, while a giddiness that seemed as though a shadow that she didn't want to face, she brought the paper closer and read each line again, in frantic anxiety. As Graydon watched her, her wrists trembled very tender, and ineffable, hovering about his lips. Out of the eccentric pattern of the exaggerated

"Tell me," she pleaded, "What is it you're doing to me?"

The Old Man, forgetting for the moment the fluctuations in the price of Manchester cotton and the seasons demand for Highland plaid, pictured her as a shop girl, a bit of a lassie, bewildered by a beam of sunlight breaking through a mist.

And then Joanna looked up at him. Doubts and confusion had gone from her face. It was lit with the taunting smile of one who had solved a riddle. "What's a need?" a doctor?

Graydon shook his head. "I'm all very real Joanna. You came in to me a while ago, a little lady of very small means, and I told you again you will be a veritable princess in a kingdom of money."

Joanna crumpled back in her chair. She brushed her forehead with the back of a hand.

"Please, Sir, I'm done," she pleaded, "I am a fool of me."

The earnestness, the seriousness of the man who confronted her puzzled her, and sent her floundering for other words. He pointed to the paper she still had in her hand.

"Tell me also," he said, "Perhaps the sound of it will help you."

After she had murmured her patient doubt, "It says it's from a boy," she obeyed him, mechanically:

"And it says, the doctor will tell the good doctor to patify you that there has been placed on deposit with

AVOIDED AN OPERATION

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

Calgary, Ontario.—"When I was first married I was very thin and weak. The doctor said I was weak and that I would never be able to have a child, but I did, and from medicine and Lydia E. Pinkham's Vegetable Compound I took care of myself. I was a burden, and doctors said an operation was needed. But my husband was opposed to that, I had seen Lydia E. Pinkham's vegetable compound and I thought I could feel it helping me. I took it and I got well again. Now I have three girls and a boy and have done my work up to competition. I am a good mother and wife. Life and love my good health to Lydia E. Pinkham's Vegetable Compound. I take a bottle of Lydia E. Pinkham's Vegetable Compound every day."

Mrs. DAYMAN, R. R. No. 5, Cawood, Ontario.

Boldly conquers everywhere.

W. N. U. 1623

this institution, to your credit, the sum of One Million Dollars, in cash and securities, subject to your personal check and such other disposition as you may wish to make of these funds.

"We beg to say here, that this deposit has been made by a partner of this house, who has handed over to us the source of your funds nor the modulus which have assembled them for you. We have not considered it necessary to enclose into these matter the name of the identity of the depositor, nor as to the reasons for the injunction upon us to not disclose him identically to you."

The girl faltered, and looked again at the man who was watching her tentatively. The dark sunwheel in her brow. Her eyes still grieved, "you see," she argued desperately, "I told you—somebody's house that ought to be protected."

Graydon pointed to the paper shaking in her trembling fingers. She read for him the closing paragraph:

"We are sending you, through your employer your bank book with an entry for the amount you are given to us to understand that Mr. Graydon will amplify certain requests included above. We trust—"

Heller voice faded through the speechless silence, and added his assistance. When she turned her eyes Graydon had dropped into his chair, across the table from her. She looked at him blankly.

Graydon's eyes were bright, showing in his words, as he continued, the need to penetrate the understanding of the girl whose mind struggled against a pain that overwhelmed her.

"You may accept each sentence with complete confidence," he said. "The memory is there ready for you. Downstairs, at the curb, my own car is waiting to take you, and your bank book, to the hotel. There you will sleep, just as you have done since the morning, just a scratch of the pen, and the rest—"

He paused, and his fingers again played with the Jade paper weight. In that slight pause Joanna—the Joanna whom he had seen were traits of wisdom, wholeness, character, and in the depth of the greenish hue of the department store. That girl, who was one of those who bargained, bargained with her eyes against the purpose of her heart; bargained the silence of the room, and the edges of her eyes and the corners of her lips against the world, of which the crowds out there were a symbol, became a flower, a delicate, exquisite blossom that some irreverent householder had painted into a faded taste of foots.

She was right, after all? Ogly, it had been a mistake, a costly mistake! A costly little ploy, with all the elaborate stage setting? A million dollars? A new kind of gesture made by some idiot who thought she wouldn't be wise in it. A simple, a direct, a honest, a good gift.

"Just Dip to Tint or Boil to Dye

to die, and then she was right, as laughingly as it had been craftily given.

"She had dropped the letter to the floor and gone. Her lips set into the firm line of a smile, and her penciled contours.

"Now you're getting it, Mr. Graydon," she exclaimed. "I thought there'd be a catch in it. What's the rest?"

The man only shook his head, rather sadly, as if he suffered a little before the spectacle of a girl, fresh and young and gay, who had been born to be the object of his admiration.

Before this soft Joanna again was speechless. Graydon went on: "You may not even ask a question. In return, none will be asked of you. It is possible that you shall never know the secret of my wealth, and the reason is, I know the motives that may not reveal them to you. I may only say, and I hope you will have a little trust in me—that you need no more trouble and no more mystery than you can bear."

"There are no obligations," he said, still shaping his words slowly. "The stupendous gift is yours without conditions. Is that what you would have asked?"

"A thousand thanks for this," she said, holding him close, and she could not go on. All her reasoning, for wisdom, her safeguards were beaten away as if they were futile things. She heard Graydon say what still mingled her heart, but her lips were sealed. "You will not be asked to give anything."

The old man's eyes opened, and he reached for his pipe and the necessary entered—the strangely soft manner, unobtrusive kinship in whom Joanna had first seen utter unattractiveness, but who had caused her to

"You will not be asked to give anything."

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the flavor, that adds savor, that multiplies customers, is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

**Stop the
Thief—
that steals /
Your
Property!**

Sun, rain, frost and snow are the thieves that steal the very life out of exposed property.

Barriers, roofs, walls, destroyed by the elements are lost—There is no insurance and no protection.

Protect to insure more than ever before. Inspect your property and get rid of the thief.

MARTIN-SENIOR

Red School-House Paint
For Barns-Roofs-Fences-Tin and Ironwork.

Made of English Red Oxide, mixed in scientific proportion and finely ground by the most modern methods so as to give the paint its peculiar consistency with the oil, producing a paint that is unequalled for painting barns, silos, roofs, fences, grain elevators, etc.

It is a bright red that stays red—it withstands the effects of sun, rain, snow, frost and fog, and will look well for many years.

Write us for free booklets, "Home Painting Made Easy" and "Good Varnish." Send a post card for your name and address to our Winnipeg office today.

Seed Grain for Sale

2000 bushels "Renfrew" Spring Wheat, cleaned, \$3.00 per bushel, sacks extra. Dominion seed test No. 65-2006. In six days 99% germination. This is the new wheat developed by the University of Alberta.

It is a very strong, vigorous wheat that over a period of six years has produced an average of 8 bushels per acre more than "Marquis." Renfrew is equal to Marquis in milling quality.

A FINE BATHROOM

Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful fixtures in your bathroom can be kept in a glossy condition with very little care—and there are no difficult corners where only an acrobat could hope to clean successfully. Drop in and see our display of bathroom fixtures.

C. A. CUTTOS, Phone 177

Potatoes Wanted

I have a market for good white potatoes for eastern and States market.

They must be well sorted. Small, cracked, or damaged tubers only lower price and grade; feed them to the hogs.

Phone or write me at once stating about number of pounds you have. I will tell you the price you will get and date of shipment. Must be all sacked and sewed, not tied, with grower's name and address on each bag.

These potatoes will be shipped from Claresholm.

Gus E. A. Malchow, Shipper

Hair Grow'n or No Money

Notice the Van Es Elastic rubber massaged cap on the bottle. You rub the bottle over your head and the rubber nipples feed the hair growing medicine into the scalp. This can be done in your own home with Van Es Liquid Scalp Medicine. It gives you the strength of hair and the gloss and luster that come with perfect hair health.

Ask for our free 100-day treatment plan.
